Autumn Camping with BLUETTI

Versatile Power for Glamping and Emergency Backup

Autumn is the time to get out and enjoy the great outdoors. Planning a glamping trip or resuming a van lifestyle cannot be done without mobile power. BLUETTI's [AC200MAX](#), [EB200P](#) and [AC200P](#) are the perfect options with their massive power and flexible capacity. They can deliver around 2000W from their 2000Wh LFP batteries, which last over 3500 cycles. Typically, their capacities can be further increased by adding external battery packs of 2048Wh B230 or 3072Wh B300.

Multiple outputs (13 for AC200P, 15 for AC200MAX and EB200P) can charge various devices. The powerhouses also feature multiple charging options, including fast solar input or dual AC + solar input, to bring peace of mind for outdoor adventures.

Mobile Solar Power for Longer Playtime

One of BLUETTI's goals is to provide enough power people need in the wild. The [EB3A](#), EB55 and EB70 portable solar generators can certainly live up to expectations. They are both handy and powerful enough: The EB3A can provide 600 W power to 8 different devices from its 268 Wh LFP battery. [EB55](#) has a larger capacity of 537Wh and supports a 1400W surge, powering over 700W devices with 11 outlets. Rated at 1000 W, the [EB70](#) can charge 10 devices from its massive 716 Wh storage.

Even if the solar generators are depleted, they can be quickly replenished by fast solar charging via BLUETTI portable solar panels. All BLUETTI panels, including PV120, [PV200](#), PV350, use monocrystalline cells with up to 23.4% efficiency. They are IP65 rated for water and dust resistance. The fold-and-go design makes them easy to store and transport.

About BLUETTI

With over 10 years of industry experience, BLUETTI has tried to stay true to a sustainable future through green energy storage solutions for both indoor and outdoor use while delivering an exceptional eco-friendly experience for everyone and the world. BLUETTI is making its presence in 70+ countries and is trusted by millions of customers across the globe. For more information, please visit BLUETTI online at <https://www.bluettipower.com.au/>.
